

Professional pet purifier

Hair absorption and odor removal in one

HA-D3002

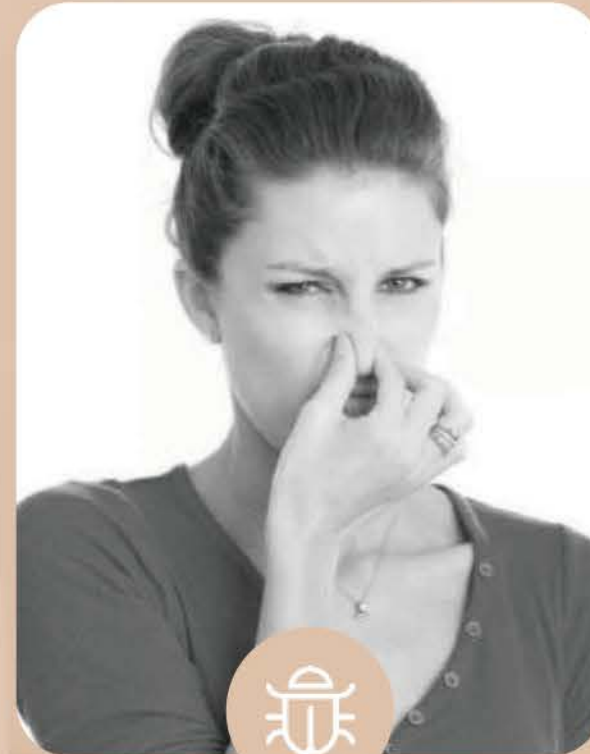

Do you have any of these pet problems?

Flouting fur is everywhere

Easy to cause allergies

Difficult to eliminate odor

Three-dimensional air duct design

Comprehensive purification of pet space

CADR of particulate matter: 300m³/h

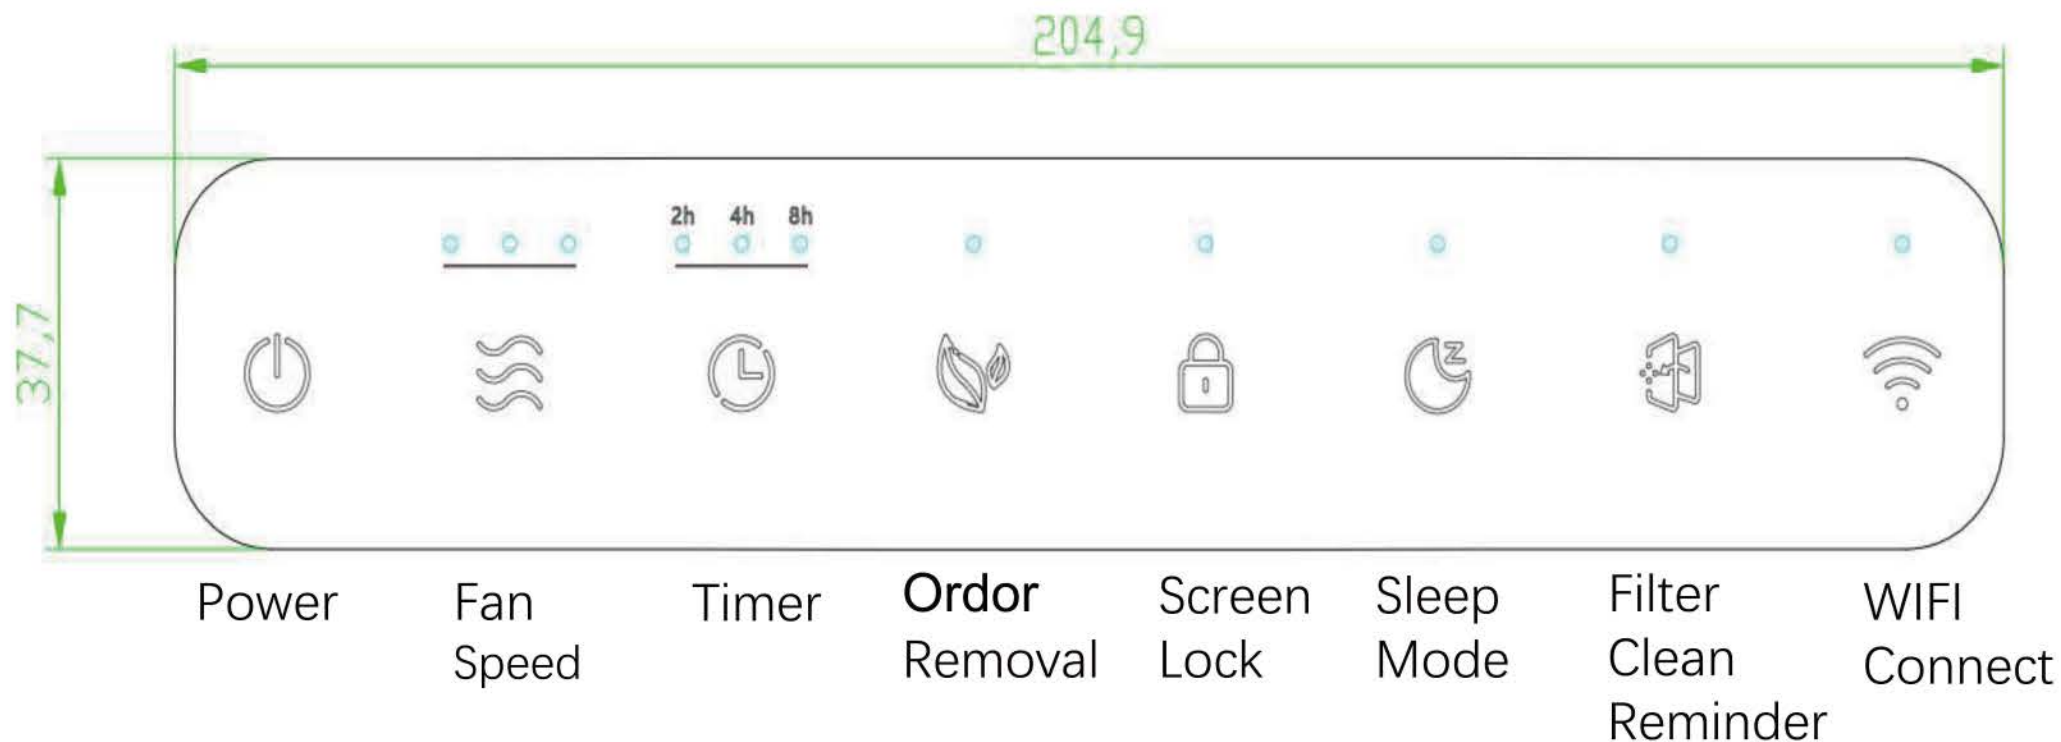

Three Fan Speed Mode : Low / Medium / High

Product Size

Multi- Function to achieve you air clean and healthy

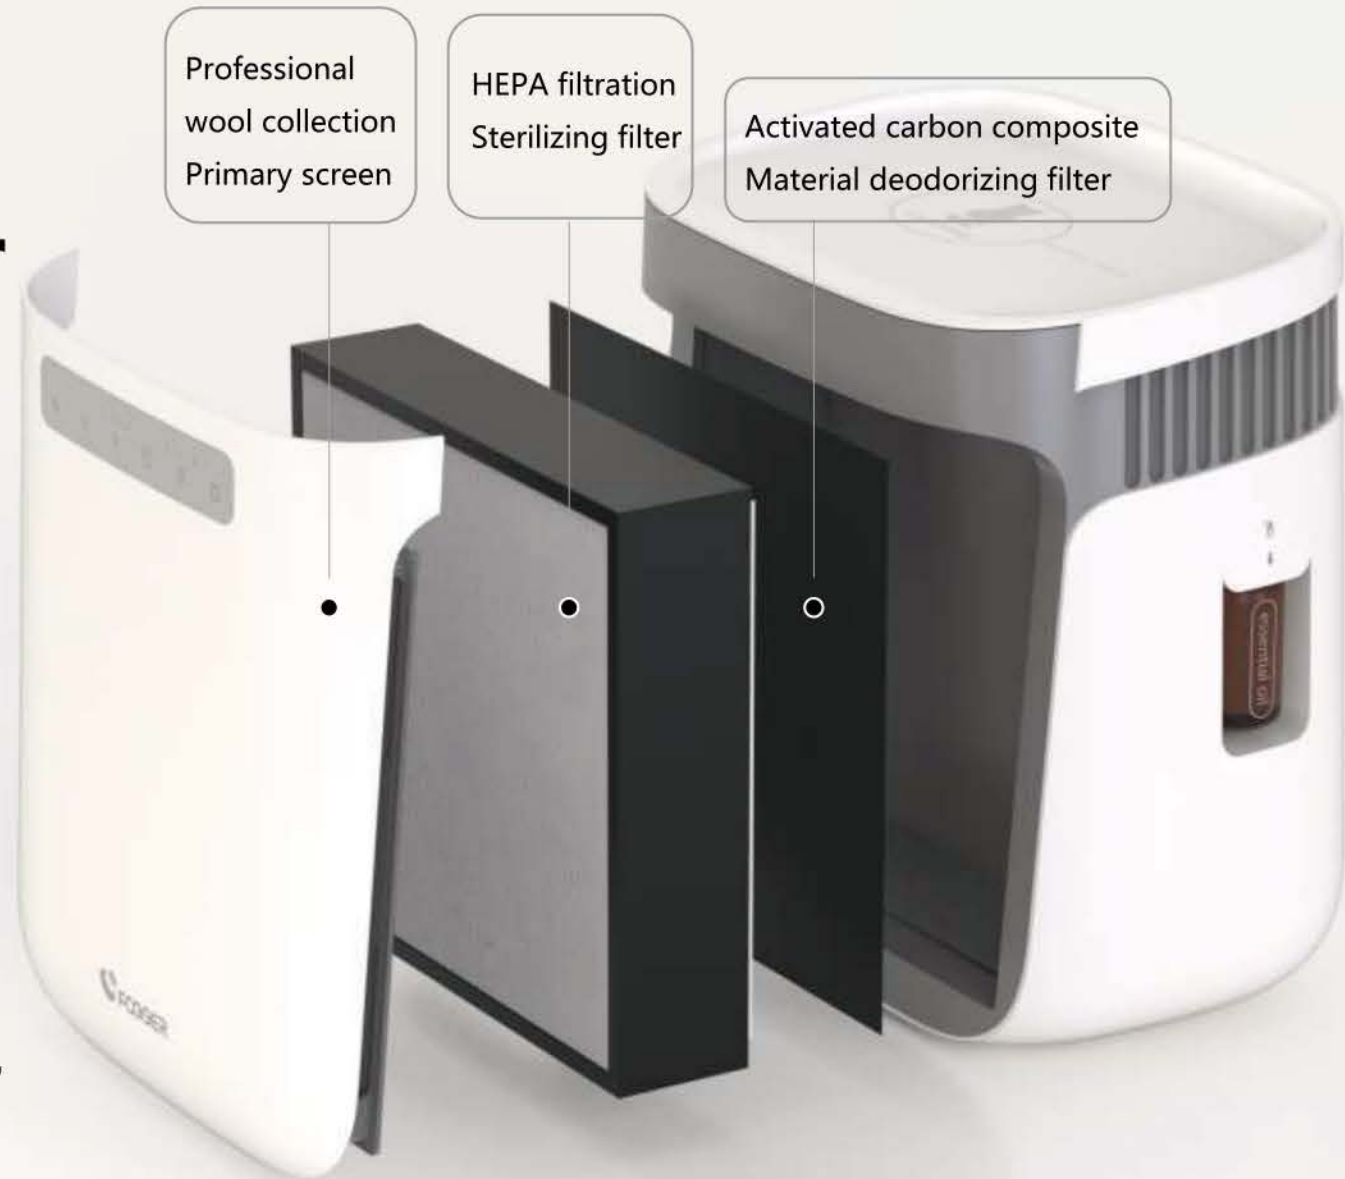

Large diameter hair suction

Not easily clogged

Three layers of professional filter

Note:

When the HEPA filter uses to 3 months, the filter clean icon light up in red, and the buzzer rings. Remind you to change or clean it.

- **Primary screen**
- **Gathering hair**

The primary filter can trap pet hair and most of the ash layer and collect it in the front cap cavity. When cleaning, the cap is opened directly and the cavity is taken to a convenient cleaning place to avoid getting hair everywhere.

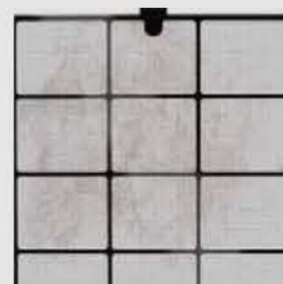

Disposable primary filter

No cleaning pressure

After the primary filter adsorbed hair, it can be thrown away directly without cleaning pressure, and then replace the new primary filter and fix it on the front shell filter frame to reduce the cleaning burden.

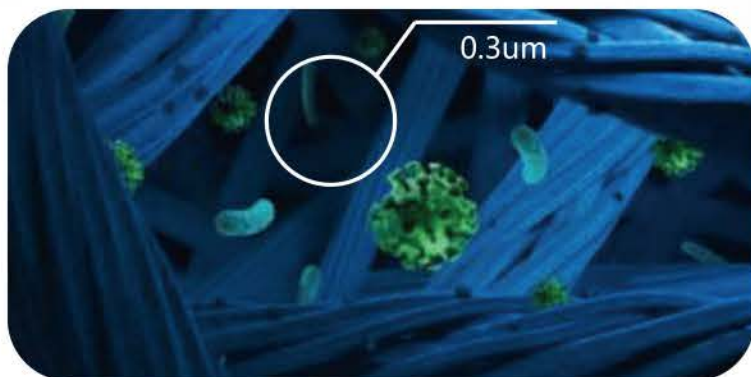

VS

On the market, the washing type initial filter has poor hair adhesion, and the hair and ash layer on the net are difficult to clean, and need to be cleaned regularly

H13 HEPA Filter screen

H13 filter physical barrier, filtration efficiency reaches 99.97%. Strongly adsorb PM2.5, 0.3~0.5um pollen and bacteria harmful to the human body, which intercepts allergens

Efficiently inactivate a variety of bacterial toxins to repel respiratory threats

Escherichia coli
Interception rate

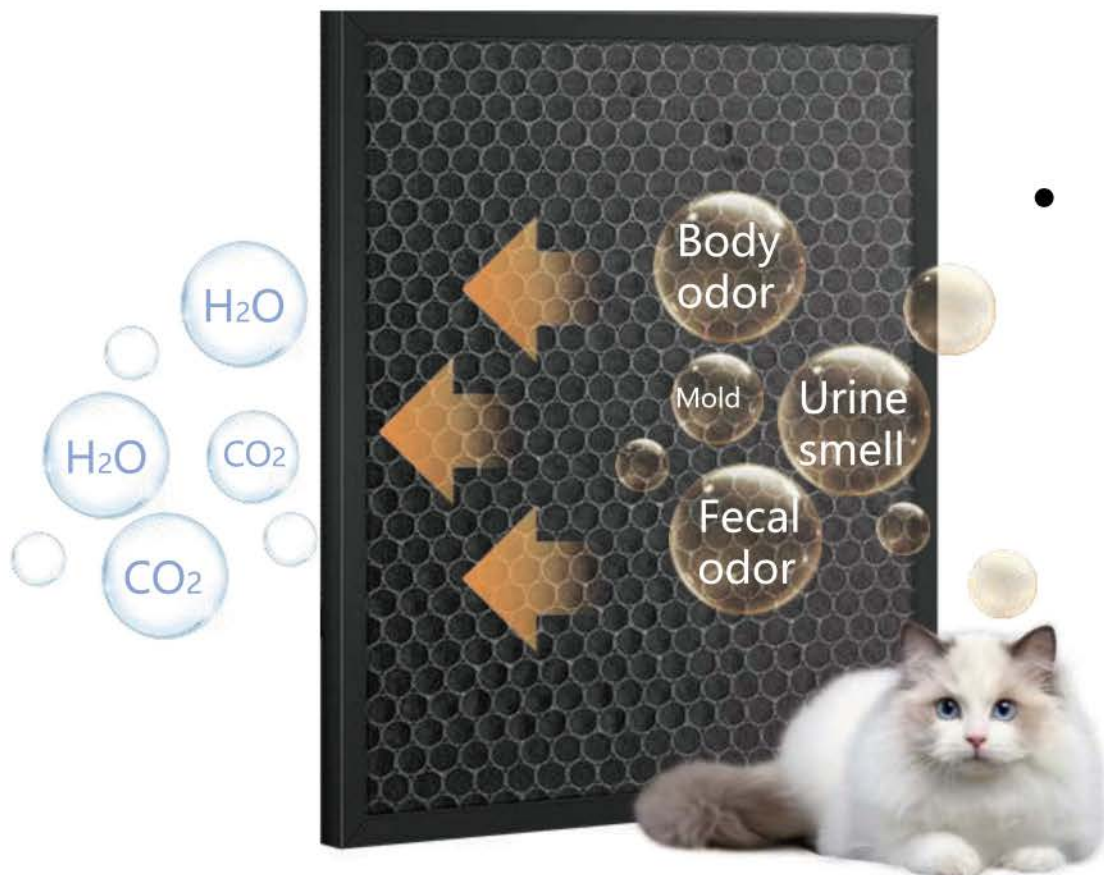

99.99%

Staphylococcus aureus
interception rate

99.99%

Staphylococcus albus
interception rate

99.99%

- **Activated carbon composite material deodorization net**
- **Double deodorization**

- Porous activated carbon, strong adsorption of odor, formaldehyde and other harmful substances
- Activated carbon breaks down odors and removes the five major odor sources in a targeted manner

90%

Hydrogen sulfide
(Smell of excrement)
Removal rate

90%

Ammonia
(Fecal odor)
removal rate

90%

Methanethiol
(Kitchen waste odor)
Removal rate

90%

Acetic acid
(Sweaty cooking odor)
Removal rate

90%

Trimethylamine
(Smelly fish egg smell)
removal rate

(The specific removal rate is subject to final laboratory test results)

Two in one deodorization and Fragrance retention

- Release odor removal factor, actively capture odor in the air, directional neutralization, precipitation odor molecules, effectively remove odor
- Release pleasant fragrance, create a good space atmosphere

Specification:

Bottle capacity: 100ml

Touch Stinky Removal button to control on/off, indicator is accordingly changed..

Notes: this mode works for 30s, and stop for 150s (interval)

Pets can lie on top of the machine

Does not affect the purification effect

Pets are allowed to lie on the top of the machine without affecting the ventilation.

The conventional air purifier on the market, when the pet lies on the top of the machine, will blow the pet hair and odor into the air, increasing the degree of air pollution

Zero ozone release, safeguarding the safety of pets and family

Ozone-free products do not pose a respiratory hazard to pets and family members

Silent operation, caring for pets' ears, ensuring quality sleep

Gently running without causing pets to experience stress reactions during use.
air quality can also be ensured even at night

- **Front cover scratching board accessory reduces scratches on cover**

Special material power cord

Not afraid bitten

Protect the safety of people and pets

According to the characteristics of some animals, the wire is made of special materials which lower the possibility of electric leakage.

*Before arriving home,
open machine in advance*

*The pets and clean air are waiting
for you at home,*

Professional pet air purifier

Purify the air, protect the health
